Experience

COMANDAS PERUMAR

FullStack Developers

Merlo, Buenos Aires.

06/2025 to 07/2025.

- **Designed** the entire platform using Figma, providing the client with a detailed interactive prototype before starting development.
- **Developed a fullstack web application** from scratch using React.js (frontend), Node.js/Express (backend), and MongoDB for data storage.
- Handled **user authentication** and session management with JWT.
- **Deployed the platform using Vercel for the frontend and Railway/MongoDB Atlas for the backend.**
- Followed **best practices in code quality, modularity, and documentation**, ensuring future scalability and maintainability.
- Maintained close communication with the client, delivering progress demos, and documenting the whole process with detailed reports.

JLA TECNICOS

FullStack Developers

Merlo, Buenos Aires.

01/2025 to 03/2025.

- Designed website layouts in Figma to provide clients with visual previews.
- Built the website using JavaScript (frontend), Node.js (backend), and Next.js, applying semantic patterns and SEO best practices.
- Conducted responsive design testing and validated the contact form (Nodemailer).
- Delivered comprehensive documentation and a detailed project report to the client.

Soft Skills

Full Stack developer with strong teamwork orientation, effective communication, and critical thinking. I excel at adapting to dynamic environments, solving problems efficiently, and collaborating with multidisciplinary teams. Focused on continuous improvement, I stay up to date with technologies and best practices, prioritizing user experience and product quality. Committed to time management, organization, and delivering scalable solutions within deadlines.
